

Aveksa Access Governance Platform

- [General information](#)
- [Business and technical information](#)

ID#: 29761

Solution name:

Aveksa Access Governance Platform

Solution description:

Aveksa enables organizations to manage business and compliance risks associated with providing users access to information resources. Aveksa governs user access by bridging the gap between IT security, business units and audit/risk & compliance teams through an approach that orchestrates across people, process and policy
