

Hello World! Now this is a longer paragraph to force the text to span more than 3 lines of text. This is useful to test pdf annotation features such as text markup annotations. A text markup annotation can have 4 subtypes: Highlight, StrikeOut, Underline, Squiggly. Currently, there is the awkward situation that Acrobat Reader does not seem to be compliant with its own PDF specification, because it assumes a different order of the points of quadrilaterals and a base line from p3 to p4.
