

Edits in „Metadata Editor“ (1/2):

The screenshot shows the 'Metadata Editor: [hogwarts-express] (imported)' window. The 'Description' tab is active. The 'Document Title' field contains 'Hogwarts Express and Platform 9¾', which is circled in red. The 'Author' field contains 'Marc Sethi'. The 'Description' field contains 'Hogwarts Express and Platform 9 and three quarters at Warner Bros. Studio Tour L'. The 'Rating' field is set to 'Unrated'. The 'Copyright Status' field is set to 'Copyrighted', which is also circled in red. The 'Copyright Notice' field contains 'Marc Sethi'. The 'Copyright URL' field is empty. At the bottom, there is a 'Select:' dropdown menu, a 'Help' button, a 'Write Metadata' button, and a 'Cancel' button.

After „Write Metadata“ and opening the “Metadata Editor” again (1/2):

The screenshot shows the 'Metadata Editor: [hogwarts-express] (imported)' window after the 'Write Metadata' button was clicked. The 'Document Title' field now contains 'Hogwarts Express and Platform 9&Afrac12', which is circled in red. The 'Author' field remains 'Marc Sethi'. The 'Description' field remains 'Hogwarts Express and Platform 9 and three quarters at Warner Bros. Studio Tour L'. The 'Rating' field remains 'Unrated'. The 'Copyright Status' field is now set to 'Unknown', which is circled in red. The 'Copyright Notice' field remains 'Marc Sethi'. The 'Copyright URL' field remains empty. The 'Select:' dropdown menu, 'Help' button, 'Write Metadata' button, and 'Cancel' button are still present at the bottom.

The added fields (Document Title, Author, Description) are missing in Exif and IPTC Viewer.
“Copyright” (Marc Sethi) was already in the original Jpeg and is correctly displayed. The added GPS values (without decimal numbers) and XMP are also correct. Please note the “type” and “lang” attributes of the added fields

Exporting to jpeg:

Except “GPS” and “Comment” (above), none of the added fields are exported to Exif or IPTC. XMP is completely empty.
