

Debian Bug report logs: Bugs in source package epiphany-browser

Maintainers for epiphany-browser are [Josselin Mouette <joss@debian.org>](mailto:joss@debian.org).

You may want to refer to the following individual bug pages: [epiphany-browser-data](#), [epiphany-browser-dbg](#), [epiphany-browser-dev](#), [epiphany-gecko](#), [epiphany-webkit](#).

You might like to refer to the [epiphany-browser package page](#), or to the [Package Tracking System](#).

If you find a bug not listed here, please [report it](#).

- [#562998](#) [n] | [epiphany-gecko] [epiphany-gecko: epiphany web browser print option does not honor libpaper1 configuration...](#)
- [#566957](#) [n] | [epiphany-browser] [Find bar hides matches](#)
- [#567252](#) [n] | [epiphany-browser] [Fails to display HTML attachment in Epiphany](#)
- [#567308](#) [n] | [epiphany-browser] [epiphany-browser: No sound right away playing HTML 5 \(?\) video from mozilla.org.](#)
- [#567311](#) [n] | [epiphany-browser] [epiphany-browser: Unable to use YouTube with HTML5 Video Player.](#)
- [#569782](#) [n] | [epiphany-browser] [epiphany-browser: fails to log in to libre.fm website](#)
- [#570142](#) [n] | [epiphany-browser] [epiphany-browser: Doesn't send Accept-Language header](#)
- [#570828](#) [n] | [epiphany-browser] [epiphany-browser: Application not recognized by bug-buddy](#)
- [#571263](#) [n] | [epiphany-browser] [epiphany-browser: sends debug messages to stdout \(or is it stderr\)](#)
- [#572619](#) [n] | [epiphany-browser] [epiphany-browser: System hang when loading http://www.linux.com/archive/feature/133849.](#)
- [#574921](#) [n] | [epiphany-webkit] [epiphany-webkit: odd behaviour with flash -- saving it repeatedly](#)

Outstanding bugs -- Normal bugs; More information needed (2 bugs)

- [#533376](#) [n|MR] | [epiphany-webkit] [epiphany-webkit: Cannot use gmail advanced attachment](#)
- [#543151](#) [n|MR] | [epiphany-webkit] [epiphany-webkit: crash on picture double click with js handler](#)

Outstanding bugs -- Minor bugs; Patch Available (2 bugs)

- [#317724](#) [m|+] [=] | [epiphany-browser] [epiphany-browser: cannot move tabs to other windows](#)
- [#572886](#) [m|+] | [epiphany-browser] [epiphany-browser: should mention Apple Safari and Google Chrome in package description](#)

Outstanding bugs -- Minor bugs; Unclassified (6 bugs)

- [#470023](#) [m] | [epiphany-gecko] [epiphany-gecko: importing bookmarks from Firefox leaves extra semicolon after apostrophe](#)
- [#486157](#) [m] | [epiphany-browser] [epiphany-browser: missing mailcap entry?](#)
- [#490406](#) [m] | [epiphany-browser] [epiphany-browser: Missing spanish translation of dialog for password saving](#)
- [#519955](#) [m] | [epiphany-gecko] [epiphany-gecko: Epiphany fails to fetch favicons](#)
- [#533522](#) [m] | [epiphany-browser] [\[epiphany-browser\] does not allow to remove entries from the awesome bar's completion list](#)
- [#565784](#) [m] | [epiphany-browser] [epiphany-browser: middle click doesn't paste URL anymore](#)

Outstanding bugs -- Wishlist items; Unclassified (10 bugs)

- [#250517](#) [w] | [epiphany-browser] [\[patch\] Please provide a mime file for associating text/html with epiphany-browser](#)
- [#360838](#) [w] | [epiphany-browser] [epiphany-browser: add epiphany-extension-gwqet to suggest field](#)
- [#402070](#) [w] | [epiphany-browser] [epiphany-browser: Generating PDF is not supported](#)
- [#420338](#) [w|u] | [epiphany-browser] [Feature request: external editor](#)

- [#506943](#) [w|] [epiphany-browser] [epiphany-browser: no way to edit/create a cookie value](#)
- [#521914](#) [w|] [epiphany-gecko] [epiphany-gecko: Please reduce the number of displayed suggestions when typing in the address entry](#)
- [#533272](#) [w|] [epiphany-browser] [epiphany-browser: Separate important cookies from the junk ones](#)
- [#544385](#) [w|] [epiphany-browser] [epiphany-browser: Add option to load session on start](#)
- [#548377](#) [w|] [epiphany-browser] [epiphany-browser: Home page shouldn't be displayed on new tab](#)
- [#550598](#) [w|] [epiphany-gecko] [epiphany-gecko: please allow user to choose not to receive further security warnings](#)

Outstanding bugs -- Wishlist items; Will Not Fix (1 bug)

- [#262535](#) [w|u@] [epiphany-browser] [epiphany-browser: Close tabs with middle-click](#)

Forwarded bugs -- Important bugs (9 bugs)

- [#357904](#) [i| ~] [epiphany-browser] [epiphany-browser: strange hangs all the time](#)
- [#476955](#) [i| ~] [epiphany-browser] [extensions API changed but the directory to look for them is the same](#)
- [#494058](#) [i|U|=~] [epiphany-gecko] [epiphany-browser: Download window is broken](#)
- [#504441](#) [i|U|~] [epiphany-gecko] [epiphany-gecko crashes on quit](#)
- [#506650](#) [i|U|~] [epiphany-browser] [epiphany-browser: page state not restored when pressing Back](#)
- [#507097](#) [i|U+|~] [epiphany-browser] [Segmentation fault in GtkTrayIcon](#)
- [#532866](#) [i| ~] [epiphany-browser] [epiphany-browser: Segfault on adding a bookmark](#)
- [#554270](#) [i| ~] [epiphany-browser] [\[epiphany-browser\] CTRL+W should not close tabs with the Emacs Gtk key theme](#)
- [#572299](#) [i| ~] [epiphany-browser] [epiphany-browser: Crashes when going back on some pages](#)

Forwarded bugs -- Normal bugs (21 bugs)

- [#192221](#) [n|u|=~] [epiphany-browser] [Must respect value of DISPLAY](#)
- [#218480](#) [n|u|~] [epiphany-browser] [epiphany-browser: Bad guess for remaining time](#)
- [#221772](#) [n|Uu|~] [epiphany-browser] [epiphany-browser: Epiphany doesn't care about GNOME interface settings?](#)
- [#410393](#) [n| ~] [epiphany-browser] [Does not download full video after partial viewing within browser](#)
- [#428344](#) [n| ~] [epiphany-browser] [epiphany gets confused by a shared home directory](#)
- [#430914](#) [n| ~] [epiphany-browser] [Epiphany prints with zero margins between header-footer and border](#)
- [#438491](#) [n| ~] [epiphany-browser] [epiphany-browser: show pages from localhost when working offline](#)
- [#444974](#) [n| ~] [epiphany-gecko] [With HighContrastInverse GTK theme, links are blue-on-blue](#)
- [#463026](#) [n| ~] [epiphany-browser] [error in saved files extension](#)
- [#463683](#) [n| ~] [epiphany-browser] [epiphany-browser: Loads both old session and crashed session when selecting Restore after crash](#)
- [#474027](#) [n| ~] [epiphany-browser] [epiphany crashes on using epilicious sync](#)
- [#478198](#) [n| ~] [epiphany-webkit] [\[epiphany-webkit\] Can't customize fonts](#)
- [#487525](#) [n| Δ~] [epiphany-browser] [epiphany-browser: Nearby sites does not work](#)
- [#509823](#) [n|U|@~] [epiphany-browser] [epiphany-browser: Epiphany always downloads in the /tmp/ folder no matter where I tell it to download!](#)
- [#524899](#) [n|U|~] [epiphany-gecko] [epiphany-gecko: Epiphany fails to load Google Maps properly](#)
- [#531691](#) [n|U|~] [epiphany-browser] [usr/bin/epiphany: Tries to download files to /; which obviously fails](#)
- [#548405](#) [n| |=~] [epiphany-browser] [epiphany-browser: Doesn't fill login forms](#)
- [#548428](#) [n| ~] [epiphany-webkit] [epiphany-webkit fails to handle target="_blank" properly](#)
- [#548601](#) [n| ~] [epiphany-webkit] [epiphany-webkit: Password database migration is a headache](#)
