

Step 1: Create a new playlist and drag the songs from an existing playlist where the songs have **track numbers starting at one**. Make sure it is in **unsorted order**, where no columns have a sorting triangle over them. **If any columns have a sorting triangle over them, click it until it disappears.**

	Name	Artist	Album	Genre	Rating	Time
1	Divine	Dionysus	Anima Mundi	Metal		4:09
2	Bringer Of War	Dionysus	Anima Mundi	Metal		5:02
3	Anima Mundi	Dionysus	Anima Mundi	Metal		3:30
4	Heart Is Crying	Dionysus	Anima Mundi	Metal		4:57
5	What	Dionysus	Anima Mundi	Metal		5:13
6	Eyes Of The World	Dionysus	Anima Mundi	Metal		5:35
7	March For Freedom	Dionysus	Anima Mundi	Metal		5:58
8	Closer To The Sun	Dionysus	Anima Mundi	Metal		3:14
9	Forever More	Dionysus	Anima Mundi	Metal		4:48
10	Paradise Land	Dionysus	Anima Mundi	Metal		4:53
11	March For Freedom (radio edit)	Dionysus	Anima Mundi	Metal		5:03

11 songs – 52.4 minutes – 71.9 MBRepeat All

Step 2: **Sort the playlist** by a column. In this example, I have sorted by name by clicking on the name column once. In this example, I have **selected track one**, which is fourth from the top, to delete.

Beyond the Gate

12

	Name	Artist	Album	Genre	Rating	Time
3	Anima Mundi	Dionysus	Anima Mundi	Metal		3:30
2	Bringer Of War	Dionysus	Anima Mundi	Metal		5:02
8	Closer To The Sun	Dionysus	Anima Mundi	Metal		3:14
1	Divine	Dionysus	Anima Mundi	Metal		4:09
6	Eyes Of The World	Dionysus	Anima Mundi	Metal		5:35
9	Forever More	Dionysus	Anima Mundi	Metal		4:48
4	Heart Is Crying	Dionysus	Anima Mundi	Metal		4:57
7	March For Freedom	Dionysus	Anima Mundi	Metal		5:58
11	March For Freedom (radio edit)	Dionysus	Anima Mundi	Metal		5:03
10	Paradise Land	Dionysus	Anima Mundi	Metal		4:53
5	What	Dionysus	Anima Mundi	Metal		5:13

11 songs – 52.4 minutes – 71.9 MBRepeat All

Step 3: **Delete the selected song**, which in this example was **track one**, fourth from the top. Notice how track one remains, and it was **track four that was deleted**. When the playlist was unsorted, track four was in the same place (fourth from the top) that track one (the one we tried to delete) is now that it is sorted by name.

When testing this yourself, it is best to choose a playlist that is **ordered by track number** when it is in **unsorted order**. This is because the track number will always be the same as the original position when the playlist was unsorted, making it easier to observe the behavior. Once you sort the playlists, make sure the track you select is **in a different position than when it was unsorted**. Count the rows for the **position in the sorted playlist** for the **song you delete**. When you attempt to delete that song from the playlist, the song that was **actually deleted** was the one where the track number equals the position of the song you tried to delete, or the **song that was in the same position when the playlist was unsorted**.
